Fujitsu General's Air Conditioners Designed for Nordic Performance

Fujitsu General's air conditioner has been designed to handle the frigid Nordic spec. The outdoor unit has a built-in heater to keep it from freezing during the freezing cold mid-winter season. The air conditioner uses highly cold resistant components designed to prevent freezing to provide comfortable heating even when the temperatures fall to -25°C . In addition, the high-performance DC twin rotary compressors, large heat exchanger, and Fujitsu General's proprietary PAM inverter control provide high heating capability even during low outdoor temperatures.

Nordic Technology

Powerful Heating High Efficiency Heat Exchanger

Powerful heating capacity even during low ambient temperature
Heating capacity at low ambient temperatures is greatly enhanced due to large heat exchanger volume and large cross-flow fan on indoor unit.

Keeps rated heating capacity even at -25°C outdoor temperature. (KH series)

*KMCEN series and KV series: -15°C

Anti-freezing Design High Performance Outdoor Unit

Anti-freezing

- Steel material & wide opening structure: Avoid freezing easily
- Wide machinery space: Preventing the contact of each part even when freezing
- Base heater: Enough capacity of the heater and its best layout
- Anti-freezing parts: Wire and electronic parts under low ambient temperature correspondence

High performance

- High efficiency large heat exchanger
- High performance DC twin rotary compressor

Corresponds to heating operation at -30°C outdoor air temperature. *KHCBN series *KM series and KV series: -25°C

Nordic Collection

Features Outline

Powerful heating capacity even during low ambient temperatures

Features for comfort and convenience to provide a pleasant lifestyle

Efficient operating system provides high energy saving performance

R32 refrigerant is highly environmentally friendly for the reduction of the global warming potential than other refrigerant.

*¹: The communication kit (UTY-TWRXZ4) is required.
*²: The external connect kit (UTY-XWZXZ5) is required.

Wireless R.C.

For ASEH09KHCBN

For ASEH12/14KHCBN

New slim and stylish square design.
Combining high energy saving and powerful heating performance for foot zone.

High heating capacity till -25°C ambient!

Heating capacity at low ambient temperatures is greatly enhanced due to large heat exchanger volume and large cross-flow fan on indoor unit.

	Max. heating capacity		
	7°C	-15°C	-25°C
09	7.00	4.90	4.00
12	8.40	6.10	4.60
14	9.00	7.10	5.40

Heating Operation at -30°C Outdoor Air Temperature

High-efficiency large heat exchanger and high-performance DC twin rotary compressor correspond to heating operation at -30°C outdoor air temperature.

High energy saving

Achieved top rank A+++ seasonal efficiency

All new KH models achieved top rank A+++ seasonal efficiency for both heating (average) and cooling.

A+++ (Average) **SCOP: 5.30** A+++ **SEER: 10.90**
A+ (Colder) *09 class

Comfort

Quiet operation & Comfortable airflow

The new model can operate silently at 19 dB(A) with high energy efficiency. You can also use it at bedtime or in silent rooms. In addition, room air can be circulated by moving the fan in the indoor unit.

Quiet operation
19 dB(A)
09/12 models

Plasma air clean

Air passing through the indoor unit is cleaned by a built-in electrostatic dust collector. Pollen, house dust and other tiny pollutants are collected and removed with static electricity.

Generating low concentration ozone

Smart device control

By integrated wireless LAN adapter, you can control it from anywhere with your smart device.

* You need to install the AIRSTAGE Mobile app on your smart device in order to control the air conditioner.

KM

Series

- External Switch Controller: UTY-TERX
- Network Converter for single split (DC power supply type): UTY-VTGX
- Network Converter for single split (AC power supply type): UTY-VTGXV
- KNX® Converter*2: UTY-VKSX
- MODBUS® Converter*2: UTY-VMSX
- External connect kit*2: UTY-XWZXZ5
- Silver ion filter: UTR-FA16-5

*1: Communication kit (UTY-TWRXZ2) is required.

*2: These options can be used only when the wireless LAN adapter is removed.

Wireless R.C.

For ASYG09KMCEN

For ASYG12KMCEN

For ASYG14KMCEN

Aesthetic exterior with strong heating performance.

High heating capacity till -15°C ambient!

Heating capacity at low ambient temperatures is greatly enhanced due to large heat exchanger volume and large cross-flow fan on indoor unit.

High energy saving

Achieved top rank seasonal efficiency

All KMCEN models achieved high rank seasonal efficiency. Fujitsu General advanced inverter technology and high performance components provide high efficiency and low energy consumption.

Comfort

Weekly timer

You can set operation schedules up to 4 settings for each day of the week and can also specify temperature settings using the On timer.

Smart device control

By integrated wireless LAN adapter, you can control it from anywhere with your smart device.

You need to install the AIRSTAGE Mobile app on your smart device in order to control the air conditioner.

NEW AIRSTAGE Mobile

Easy Installation

Installation when left outlet piping is easier by removable under cover of the indoor unit chassis. Installation when center outlet piping is easier by design change of wall hook bracket.

Wireless R.C.

For AGE09/12/14KVCB

Compact body and strong heating for foot zone with standard functions.

High heating capacity till -15°C ambient!

Heating capacity at low ambient temperatures is greatly enhanced due to large heat exchanger volume and large cross-flow fan on indoor unit.

High heating max capacity

Top class heating capacity is achieved by high efficiency compressor. Regarding new floor 12 model, max heating capacity improved by 8.8% vs current model.

Max. heating capacity (12 class)	
New model	6.20
current model	5.70

Comfort

10°C heat mode operation
When you leave, minimum heating operation is performed to maintain the room temperature.

High energy saving

High SCOP value for heating

New KV models achieved top rank seasonal efficiency. Fujitsu General advanced inverter technology and high performance components provide high efficiency and low energy consumption.

SCOP (9 class)	
New model	4.40
current model	4.20

Flexible & easy installation

*Concaved position installation with conceal is prohibited.

Feature explanation

Energy saving function

- Save occupancy sensor**
Occupancy sensor detects the movement of people in the room and judges whether the energy saving operation.
- Economy operation**
Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.

- 6-step air flow control**
The operating airflow level can be selected from 6 steps depending on the environment.
- 10°C heat**
The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.
- Outdoor unit low noise operation**
Sound noise level of outdoor unit can be selected.

- Auto changeover**
The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.
- Double swing automatic**
Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.
- UP/DOWN swing louver**
The up/down flaps automatically swing up and down.
- Automatic fan speed**
The micro-computer automatically adjusts the airflow effectively to follow the changes of room temperature.

Comfortable function

- Powerful heating**
Keeping the rated heating capacity even when the outdoor ambient temperature is -7°C.
- Power diffuser**
An additional louver that opens based on monitoring sensors to quickly enhance immediate comfort needs.
- Powerful operation**
Operation at maximum airflow and compressor speed, and quickly makes the room comfortable.
- Fan control in heating operation**
The fan control in heating can be switched between reducing the feeling of cold air and prioritizing the set air volume.

Convenient function

- Sleep timer**
The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.
- Program timer**
This digital timer allows selection of one of four options: ON, OFF, ON + OFF or OFF + ON.
- Weekly timer**
Different on-off times can be set for each day.
- Weekly + setback timer** *Optional parts is necessary
Weekly + setback timer can set temperature for two times spans and for each day of the week.
- Filter sign**
Indicates the filter cleaning period by lamp.
- Wireless LAN control**
The exclusive Wireless LAN adaptor enables to operate the air conditioner by smartphone or tablet PC from outside.

Clean function

- Ion deodorization filter**
The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.
- Apple-catechin filter**
The Apple-catechin filter uses static electricity to clean fine particles and dust in the air.
- Washable panel**
Since the front panel is easy to remove, maintenance is also easy.
- Silver ion filter**
The Silver ion filter helps to keep indoor air free from viruses, bacteria and molds.
- Plasma air clean**
The electrostatic precipitator removes dust particles such as pollen and house dust. It is washable and thus can always be kept clean.
